About Me

- Business Intelligence and Integration Architect at Wellesley College
- Oracle Database Design and Development – 30 years
- SQL Server Database and Business Intelligence Stack – 5 years
- 8 Time SQL Saturday Boston Attendee
- First Time Presenter
- Email: adipesa@wellesley.edu
- Twitter: [@adipesa](https://twitter.com/adipesa)

AGENDA

- What is JSON?
- Why Use JSON with SQL Server?
- SQL Server 2016 Support for JSON
- Get JSON Formatted Data Into SQL Server Tables
- Get Data Out from SQL Server Tables in JSON Format
- Power BI Visualization of JSON Data

What is JSON?

- JavaScript **O**bject **N**otation
- Lightweight Data Interchange Format
- Facilitates Integration of Data Between Systems / Applications
- Easy to Read and Write
- Easy to Parse and Generate

Source: <http://www.json.org/>

What is JSON?

- Name / Value Pairs
 - {"title":"Scream","year":1996,"director":"Wes Craven"}
 - {"title":"Halloween","year":1978,"director":"John Carpenter"}
- JSON Data Types
 - String, Number, Boolean (true or false), null
 - Array
 - "genre":["Horror", "Slasher"]
 - Object
 - "movie":{"MovieId":29213,"Title":"Friday the 13th","ReleaseYear":1980,"Director":"Sean S. Cunningham","CastListing":["Betsy Palmer", "Adrienne King", "Kevin Bacon"],"Genre":"Horror"}

Movies JSON Data Set

The screenshot shows the JSON Editor Online interface. The left pane displays a JSON array of movie objects. The right pane shows a search results view for the movie 'Halloween'.

JSON Editor Online Interface:

- Left Pane (Raw JSON):** Displays a JSON array of movie objects. The visible portion includes:

```
[{"cast": "Harold Lloyd", "genre": null, "notes": null, "title": "Huckleberry Finn", "year": 1920, "director": "William Desmond Taylor", "cast": "Wallace Beery", "genre": null, "notes": null, "title": "If I Were King", "year": 1920, "director": "J. Gordon Edwards", "cast": "William Farnum, Betty Ross Clarke", "genre": "Drama", "notes": null, "title": "In Wrong", "year": 1920, "director": "Albert Russell", "cast": "Hoot Gibson", "genre": "Western", "notes": null, "title": "The Jack-Knife Man", "year": 1920, "director": "King Vidor", "cast": "F. A. Turner, Harry Todd", "genre": "Drama", "notes": null, "title": "The Jay Bird", "year": 1920, "director": "Phil Rosen", "cast": "Hoot Gibson", "genre": "Western", "notes": null, "title": "Judy of Rogue's Harbor", "year": 1920, "director": "William Desmond Taylor", "cast": "Mary Miles Minter, Charles Meredith", "genre": "Drama", "notes": null, "title": "Lady Rose's Daughter", "year": 1920, "director": "Hugh Ford", "cast": "Elsie Ferguson, David Powell", "genre": null, "notes": null, "title": "The Last of the Mohicans", "year": 1920, "director": "Clarence Brown, Maurice Tourneur", "cast": "Wallace Beery", "genre": "Adventure", "notes": null, "title": "The Leopard Woman", "year": 1920, "director": "Wesley Ruggles", "cast": "Louise Glaum, House Peters", "genre": "Adventure Romance", "notes": "Feature length", "title": "Love, Honor, and Behave", "year": 1920, "director": "F. Richard Jones, Erle C. Kenton", "cast": "Charlie Murray", "genre": null, "notes": null, "title": "Madame X", "year": 1920, "director": "Frank Lloyd", "cast": "Pauline Frederick", "genre": null, "notes": null, "title": "The Man with the Punch", "year": 1920, "director": "Edward Laemmle", "cast": "Hoot Gibson", "genre": null, "notes": null, "title": "The Mark of Zorro", "year": 1920, "director": "Fred Niblo", "cast": "Douglas Fairbanks", "genre": "Swashbuckler", "notes": null, "title": "Masked", "year": 1920, "director": null, "cast": "Hoot Gibson", "genre": null, "notes": null, "title": "The Mollycoddle", "year": 1920, "director": null, "cast": null, "genre": null, "notes": null, "title": null, "year": null}
```
- Right Pane (Search Results):** Shows 17 results for the search term 'halloween'. The results are displayed as a list of objects, with the details for the movie 'Halloween' (ID 10097) expanded:

```
{ "id": 10097, "title": "Halloween", "year": 1978, "director": "John Carpenter", "cast": "Donald Pleasence, Jamie Lee Curtis, P.J. Soles, Charles Cyphers, Kyle Richards", "genre": "Horror", "notes": "inspired Halloween film franchise" }
```

Why Use JSON with SQL Server?

- Automate Data In to SQL Server From NoSQL Sources
- Automate Data Out From SQL Server from NoSQL Sources
- Integrate Data To / From Many Cloud-Based Services
- Represents Nested Relationships Flexibly
- More Compact and Readable Than CSV and XML Formats

SQL Server 2016 Support for JSON

Source: <https://docs.microsoft.com/en-us/sql/relational-databases/json/json-data-sql-server?view=sql-server-2017>

SQL Server 2016 Support for JSON

- Facilitating Data In
 - ISJSON
 - OPENROWSET
 - OPENJSON
- Facilitating Data Out
 - FOR JSON AUTO
 - FOR JSON PATH
 - FOR JSON PATH, ROOT
 - INCLUDE_NULL_VALUES
 - JSON_VALUE
 - JSON_QUERY

Note: No JSON-specific column data type. Use nvarchar(max)

Photo taken at Museum of Pop Culture – Seattle, WA

Get JSON Formatted Data Into SQL Server Tables

```
insert into dbo.MoviesJSON(MoviesJSON)
```

```
select MoviesData.*
```

```
from openrowset (bulk 'C:\Presentations\Boston Code Camp\wikipedia-movie-data-master\movies.json', single_clob) as MoviesData;
```

```
select ISJSON(MoviesJSON) IsJSON, MoviesJSON, len(MoviesJSON) as LengthMoviesJSON
```

```
from dbo.MoviesJSON;
```

Photo taken at Museum of Pop Culture – Seattle, WA

SQL Server 2016 – JSON In Demo

Image Source: Pixabay

Get Data Out from SQL Server Tables in JSON Format

```
select *  
  
from dbo.Movies  
  
where Genre like '%Horror%'  
  
FOR JSON PATH, ROOT('Movies');  
  
select *  
  
from dbo.Movies  
  
where Genre like '%Horror%'  
  
FOR JSON PATH, WITHOUT_ARRAY_WRAPPER;
```
